1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY/UNDERTAKING

Material Name : Toluene  
Uses : Raw material for use in the chemical industry. Solvent.  
Product Code : T1402, Q9138, Q9131, Q9250, Q9300, Q9308, X211H  
Manufacturer/Supplier : Shell South Africa Chemicals  
Reunion Rocks Road  
4110 Isipingo  
South Africa  
Telephone : +27 (0)31 913 2000  
Fax : +27 (0)31 902 5228 / 902 5768  
Emergency Telephone Number : South Africa :+27 (0)31 902 4075 or +27 (0) 836291307  
Zimbabwe : Normal; (04) 703115/117 or 011 200072/73 Kenya :0925411 491 328

2. COMPOSITION/INFORMATION ON INGREDIENTS

Material Formal Name : Benzene, methyl  
Synonyms : Methyl benzol  
Phenyl methane  
Toluol  
CAS No. : 108-88-3  
INDEX No. : 601-021-00-3  
EINECS No. : 203-625-9

3. HAZARDS IDENTIFICATION

Health Hazards : Harmful: danger of serious damage to health by prolonged exposure through inhalation. Vapours may cause drowsiness and dizziness. Slightly irritating to respiratory system. Irritating to skin. Moderately irritating to eyes. Harmful: may cause lung damage if swallowed. Possibility of organ or organ system damage from prolonged exposure; see Chapter 11 for details. Target organ(s): Auditory system. Central nervous system (CNS). Respiratory system. Visual system. Possible risk of harm to the unborn child.

Signs and Symptoms : Eye irritation signs and symptoms may include a burning
sensation, redness, swelling, and/or blurred vision. Skin irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blisters. If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath, and/or fever. The onset of respiratory symptoms may be delayed for several hours after exposure. Breathing of high vapour concentrations may cause central nervous system (CNS) depression resulting in dizziness, light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and death. Auditory system effects may include temporary hearing loss and/or ringing in the ears. Visual system disturbances may be evidenced by decreases in the ability to discriminate between colours.

Aggravated Medical Condition: Pre-existing medical conditions of the following organ(s) or organ system(s) may be aggravated by exposure to this material: Auditory system. Central nervous system (CNS). Respiratory system. Eyes. Skin. Visual system. Kidney.

Safety Hazards: Highly flammable. In use, may form flammable/explosive vapour-air mixture. Electrostatic charges may be generated during pumping. Electrostatic discharge may cause fire.

Environmental Hazards: Not classified as dangerous under EC criteria.

4. FIRST AID MEASURES

General Information: Keep victim calm. Obtain medical treatment immediately.

Inhalation: DO NOT DELAY. Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.

Skin Contact: Remove contaminated clothing. Immediately flush skin with large amounts of water for at least 15 minutes, and follow by washing with soap and water if available. If redness, swelling, pain and/or blisters occur, transport to the nearest medical facility for additional treatment.

Eye Contact: Immediately flush eyes with large amounts of water for at least 15 minutes while holding eyelids open. Transport to the nearest medical facility for additional treatment.

Ingestion: If swallowed, do not induce vomiting; transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.

Advice to Physician: Potential for chemical pneumonitis. Consider: gastric lavage with protected airway, administration of activated charcoal. Potential for cardiac sensitisation, particularly in abuse situations. Hypoxia or negative inotropes may enhance these effects. Consider: oxygen therapy.

5. FIRE FIGHTING MEASURES

Clear fire area of all non-emergency personnel.

Specific Hazards: The vapour is heavier than air, spreads along the ground and distant ignition is possible. Will float and can be reignited on
6. ACCIDENTAL RELEASE MEASURES

Avoid contact with spilled or released material. Immediately remove all contaminated clothing. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. For guidance on disposal of spilled material see Chapter 13 of this Material Safety Data Sheet. Observe all relevant local and international regulations.

Protective measures: Isolate hazard area and deny entry to unnecessary or unprotected personnel. Stay upwind and keep out of low areas. Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Use appropriate containment (of product and fire fighting water) to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Attempt to disperse the vapour or to direct its flow to a safe location for example by using fog sprays. Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Ventilate contaminated area thoroughly.

Clean Up Methods: For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely. For small liquid spills (< 1 drum), transfer by mechanical means to a labelled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

Additional Advice: Notify authorities if any exposure to the general public or the environment occurs or is likely to occur. Local authorities should be advised if significant spillages cannot be contained. The vapour is heavier than air, spreads along the ground and distant ignition is possible. Vapour may form an explosive mixture with air. See Chapter 13 for information on disposal.

7. HANDLING AND STORAGE

General Precautions: Avoid breathing of or contact with material. Only use in well ventilated areas. Wash thoroughly after handling. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. Use the...
information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

Handling  : Avoid contact with skin, eyes, and clothing. Extinguish any naked flames. Do not smoke. Remove ignition sources. Avoid sparks. Electrostatic charges may be generated during pumping. Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Restrict line velocity during pumping in order to avoid generation of electrostatic discharge (<= 1 m/sec until fill pipe submerged to twice its diameter, then <= 7 m/sec). Avoid splash filling. Do NOT use compressed air for filling, discharging, or handling operations. Handle and open container with care in a well-ventilated area.

Storage  : Vapours from tanks should not be released to atmosphere. Breathing losses during storage should be controlled by a suitable vapour treatment system. Bulk storage tanks should be diked (bundled). Must be stored in a diked (bundled) well-ventilated area, away from sunlight, ignition sources and other sources of heat. Keep away from aerosols, flammables, oxidizing agents, corrosives and from other flammable products which are not harmful or toxic to man or to the environment. The vapour is heavier than air. Beware of accumulation in pits and confined spaces.

Product Transfer  : Keep containers closed when not in use. Do not use compressed air for filling, discharging or handling.

Recommended Materials  : For containers, or container linings use mild steel, stainless steel.

Unsuitable Materials  : Natural, butyl, neoprene or nitrile rubbers.

Container Advice  : Containers, even those that have been emptied, can contain explosive vapours. Do not cut, drill, grind, weld or perform similar operations on or near containers.

Additional Information  : Ensure that all local regulations regarding handling and storage facilities are followed.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Limits

</tr>
</tbody>
</table>

Material  | Source | Hazard Designation
---|--------|----------------------------------|
Toluene  | ACGIH  | Not classifiable as a human carcinogen.

Exposure Controls  : The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances.
Appropriate measures include: Use sealed systems as far as possible. Adequate ventilation to control airborne concentrations below the exposure guidelines/limits. Local exhaust ventilation is recommended. Firewater monitors and deluge systems are recommended. Eye washes and showers for emergency use.

**Personal Protective Equipment**

**Respiratory Protection**

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for organic gases and vapours [boiling point >65 °C (149 °F)] meeting EN141. Where respiratory protective equipment is required, use a full-face mask. Where air-filtering respirators are unsuitable (e.g., airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus.

**Hand Protection**

Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection: Longer term protection: Viton. Incidental contact/Splash protection: Nitrile rubber. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced.

**Eye Protection**

Chemical splash goggles (chemical monogoggles).

**Protective Clothing**

Chemical resistant gloves/gauntlets. Where risk of splashing or in spillage clean up, use chemical resistant one-piece overall with integral hood.

**Monitoring Methods**

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate. Examples of sources of recommended air monitoring methods are given below or contact supplier. Further national methods may be available. National Institute of Occupational Safety and Health (NIOSH), USA: Manual of analytical Methods http://www.cdc.gov/niosh/nmam/nmammenu.html Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods http://www.oshaslc.gov/dts/sltc/methods/toc.html Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances http://www.hsl.gov.uk/search.htm Berufsgenossenschaftliches Institut für Arbeitssicherheit (BIA), Germany http://www.hvbg.de/d/bia/pub/grl/grle.htm L'Institut National de Recherche et de Sécurité, (INRS), France http://www.inrs.fr/indexnosdoss.html

10. STABILITY AND REACTIVITY

- **Stability**: Stable under normal conditions of use. Reacts violently with strong oxidising agents.
- **Conditions to Avoid**: Avoid heat, sparks, open flames and other ignition sources. Prevent vapour accumulation.
- **Materials to Avoid**: Strong oxidising agents.
- **Hazardous**: Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases, including carbon monoxide, carbon dioxide and other organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

11. TOXICOLOGICAL INFORMATION

- **Basis for Assessment**: Information given is based on product data.
- **Acute Oral Toxicity**: Low toxicity: LD50 >2000 mg/kg, Rat
  Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal.
- **Acute Dermal Toxicity**: Low toxicity: LD50 >2000 mg/kg, Rabbit
- **Acute Inhalation Toxicity**: Low toxicity: LC50 >20 mg/l / 4 hours, Rat
  Classified as harmful by the European Commission. High concentrations may cause central nervous system depression resulting in headaches, dizziness and nausea;
continued inhalation may result in unconsciousness and/or death.

**Skin Irritation**: Irritating to skin.

**Eye Irritation**: Moderately irritating to eyes (but insufficient to classify).

**Respiratory Irritation**: Inhalation of vapours or mists may cause irritation to the respiratory system.

**Sensitisation**: Not a skin sensitiser.

**Repeated Dose Toxicity**
- **Central nervous system**: repeated exposure affects the nervous system. Effects were seen at high doses only.
- **Respiratory system**: repeated exposure affects the respiratory system. Effects were seen at high doses only.
- **Visual system**: may cause decreased color perception. These subtle changes have not been found to lead to functional colour vision deficits.
- **Auditory system**: prolonged and repeated exposures to high concentrations have resulted in hearing loss in rats. Solvent abuse and noise interaction in the work environment may cause hearing loss.

**Mutagenicity**: Not mutagenic.

**Carcinogenicity**: Not carcinogenic in animal studies.

**Reproductive and Developmental Toxicity**: Causes foetotoxicity in animals at doses which are maternally toxic. Does not impair fertility.

**Additional Information**: Exposure to very high concentrations of similar materials has been associated with irregular heart rhythms and cardiac arrest.

### 12. ECOLOGICAL INFORMATION

**Acute Toxicity**
- **Fish**: Toxic: $1 < \text{LC/EC/IC50} \leq 10$ mg/l
- **Aquatic Invertebrates**: Harmful: $10 < \text{LC/EC/IC50} \leq 100$ mg/l
- **Algae**: Low toxicity: $\text{LC/EC/IC50} > 100$ mg/l

**Mobility**: Floats on water.

If product enters soil, it will be highly mobile and may contaminate groundwater.

**Persistence/degradability**: Readily biodegradable meeting the 10 day window criterion.

**Bioaccumulation**: Does not bioaccumulate significantly.

**Other Adverse Effects**: In view of the high rate of loss from solution, the product is unlikely to pose a significant hazard to aquatic life.

### 13. DISPOSAL CONSIDERATIONS

**Material Disposal**: Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations.

**Container Disposal**: Drain container thoroughly. After draining, vent in a safe place away from sparks and fire. Residues may cause an explosion hazard. Do not, puncture, cut, or weld uncleaned drums. Send
Local Legislation: Disposal should be in accordance with applicable regional, national, and local laws and regulations.

14. TRANSPORT INFORMATION
